The Story of **M/Y HAVEN**

Built in 1989 by the renowned Italian shipyard Siar Moschini, this elegant motoryacht was originally launched under the name J. Olives. Her first owner was Princess Caroline Louise Marguerite Grimaldi of Monaco. From the very beginning, the yacht stood out as a refined example of naval craftsmanship, combining elegance, comfort, and reliable ocean-going capability.

Over the years, the yacht was renamed Valerie, and later L'Escapade of London. During this period she was primarily used for private cruising along the Mediterranean and the coasts of the United Kingdom, hosting distinguished guests and undertaking leisurely voyages in some of Europe's most beautiful waters. A new chapter began when the yacht was renamed Talon. Under this name, she operated along the southern coasts of the United States, serving both private and commercial purposes. Her voyages across the Atlantic and throughout the Caribbean demonstrated her exceptional seaworthiness and robust design.

The Story of **M/Y HAVEN**

However, the yacht gained her greatest recognition under the name Miraggio. During these years she became a well-known vessel in the international charter scene. Summers were spent navigating the crystal-clear lagoons of French Polynesia, while winters were dedicated to charters in the Caribbean. During this remarkable period, the yacht circumnavigated the globe four times, earning a reputation as a true ocean voyager. In 2020, the yacht underwent a comprehensive refit at the prestigious Benetti Shipyard, one of the world's most respected yacht builders. This extensive refit modernized the vessel from bow to stern, introducing contemporary technologies, upgraded safety systems, and refreshed interiors, effectively giving the yacht a new life. In 2025, the yacht entered a new era under her current name HAVEN. today she operates in the Mediterranean and the Aegean Sea, offering unforgettable charter experiences in some of the region's most spectacular cruising grounds. With a legacy spanning decades, voyages across multiple oceans, and stories written in seas around the world, HAVEN is more than a yacht-she is a floating heritage shaped by adventure, elegance, and exploration.
